MARCH 2025 / SEEDS OF CHANGE

WELCOME FROM OUR CO-DIRECTORS

All life begins with a seed. As spring unfolds, we're reminded that life awakens, renews, and grows from the smallest origins. This season invites us to plant fresh intentions, nurture inner growth, and embrace the power of transformation.

At Hippocrates Wellness, we believe in the profound impact of small changes to yield life-changing results. For nearly seven decades, we've helped countless guests worldwide sow the seeds of self-healing through the unmatched Hippocrates lifestyle—rooted in living foods, progressive therapies, science, and a deep connection to the earth's rhythms.

True wellness isn't a quick fix; it's a journey of cultivating balance in body, mind, and spirit. At Hippocrates, we empower you with the tools to reclaim resilience, reduce inflammation, and energize every cell to thrive in every season of life.

This month, let the promise of spring inspire your next step. Explore practical insights, state-of-the-art treatments, and real-life recovery stories that awaken your vitality and support lasting longevity. From a tiny seed, your transformation begins.

Be well,

Anna Maria and Brian Clement

WHAT'S NEW AT HIPPOCRATES WELLNESS THIS MONTH?

ASK THE EXPERTS

Q. How does the Hippocrates Diet fulfill the body's need for Omega-3 fatty acids for healthy brain function? - Veronica Cooper, Michigan

A. Unlike most plant-based diets, which encourage the consumption of common vegetables or fruits, the Hippocrates omega-rich foods fulfill this need more than any other plan on earth. All seeds, nuts, grains, and beans in their organic, raw state contain oils. When germinated, those oils become usable Omega-3(s) 6(s) 9(s). One's knowledge about the particular seed would determine which offers the favorite Omega-3's. Walnuts are a great example of this, as well as freshwater algae. As a matter of fact, the latter is the only food that people may consume that has essential fats identical to those that construct the brain.

- Brian Clement, PH.D., LN.

Q. How do I prevent bloating on a plant-based diet? - Michelle Black, London

A. Most of us do not masticate (chew our food well enough). Saliva is enzymes that break proteins into amino acids – carbohydrates into simple sugars and healthy fats into essential fatty acids. You also must consider when transitioning from a poor diet that the body requires time to begin functioning the way it was meant to be before you filled it with junk food, flesh, and milk from another species. For the average person, it is 1 year; for those who have been real abusers, up to 3 years. Digestive enzymes like Hippocrates LifeGive Digestive Enzymes will help reduce bloating, gas, and the time it will take you and your body to regulate.

THINK PIECE

THE INNER POWER TO TRANSFORM

BY ANNA MARIA AND BRIAN CLEMENT, PH.D., L.N.

Awakening the Body's Wisdom

Wellness is not simply the absence of disease but the full expression of life itself. At Hippocrates Wellness, we have seen time and again that the body is not fragile but profoundly intelligent and resilient. True health begins when we awaken this inner wisdom and align our daily choices with nature's blueprint. Our valued guests don't just come to feel better; they want to "become" better—to renew, rebuild, and rediscover what it means to truly thrive. Every moment is an invitation to break through old limitations and step into a vibrant, dynamic state of wellbeing.

A Journey of Strength and Renewal

One of our guests recently arrived feeling broken—physically drained, emotionally overwhelmed, and spiritually disconnected. Like many, she had tried to "fix" herself through conventional means but still felt like a shadow of her former self. After embracing the Hippocrates lifestyle—fresh, enzyme-rich living foods, daily movement, advanced therapies, and deep emotional release—she didn't just regain her strength; she transformed. Her energy returned. Her eyes brightened. Her posture changed. Her mind opened. By the end of her 21-day stay, she said, "I don't just feel alive again; I feel like I finally met myself."

Fitness: More Than Muscle

At Hippocrates Wellness, fitness is not about appearance; it's about vitality. It's about how we 'feel'. Every cell in our body responds to movement with joy. When we move with passion and purpose, we stimulate circulation, enhance detoxification, and boost neurochemical balance. Our Fitness Protocol integrates advanced bioenergetic therapies, oxygen-supported exercise, and expert coaching to tap into the body's regenerative capacity. Whether through red light therapy, cold plunges, or personalized training, we help our guests reawaken their physical potential not just for today, but for a lifetime of strength and resilience.

"Every moment is an invitation to break through old limitations."

Reclaiming Your Power

We are not victims of our genetics or past—we are creators of our present and future. Healing begins with a single decision: to believe in your body's ability to heal.

Transformation is not reserved for the elite or the extraordinary. It belongs to anyone who is ready to choose love over fear, action over apathy, and nourishment over neglect.

The unparalleled Hippocrates lifestyle is a return to what is natural and life-giving. It is not an instant fix but a path of sustained evolution—a roadmap back to self-mastery.

Transforming from Within

Your diagnosis, your age, or your history do not define you. Wellness is not something you chase—it's something you become.

When you nourish your body with pure, plant-based foods, breathe deeply, move daily, and clear emotional stagnation, you can begin to reclaim your health and vitality.

This is not just about living longer. It's about living with clarity, passion, purpose, and joy. Every act of self-care becomes a declaration of worth. Every mindful moment is a step toward the life you were meant to lead.

Transformation is not found in a pill or procedure but in the small, courageous choices we make each day to honor the life within us. . Go shine!

WELLNESS AT HOME

LIVE THE HIPPOCRATES LIFESTYLE ANYWHERE, ANY TIME

GROW THROUGH STILLNESS

Silence as a Seed

Stillness is an essential part of healing. At Hippocrates, guests are supported through mindfulness therapies, guided breathwork, and reflective practices designed to calm the nervous system and awaken inner clarity. These moments of presence create space for insight, restoration, and deeper self-connection. Begin at home with just five minutes of intentional silence each day. Remember: your path to renewal starts within.

PLANT NEW ROUTINES

Small Habits, Big Shifts

Transformation is rooted in consistency. At Hippocrates, guests engage in daily rituals that reconnect them to nature and self, such as morning wheatgrass shots, mindful movement, and Energy Medicine modalities. At home, start by integrating one small act of self-care each day. Over time, these seeds of change bloom into vibrant health, emotional clarity, and a life aligned with your highest and happiest self.

CLEANSE THROUGH COLOR

Raw & Regenerating

Support detoxification this spring with vibrant, organic living foods—just as we serve daily at Hippocrates. Nourish your body with enzyme-rich sprouts, alkalizing leafy greens, and mineral-rich sea vegetables to replenish your cells and support liver function. These raw, high-vitality foods are foundational to deep cellular cleansing and energy renewal. True transformation begins with color, consistency, and conscious choices.

CHEF KEN'S RECIPE OF THE MONTH

Made with sunflower seeds, a symbol of resilience and optimism, this vibrant recipe reflects the essence of spring renewal. Just as the sunflower turns toward the light, each nourishing bite invites us to embrace growth, transformation, and the power to change direction.

BETTER THAN TUNA

Ingredients:

3 cups of shelled sunflower seeds, soaked and rinsed
½ cup of water
¼ cup of fresh lemon juice
1 ½ tablespoons of Bragg Liquid Aminos (or to taste). You can substitute with kelp, dulse, or green salt if desired

Other Ingredients:

1 cup of celery, diced
½ cup of white onion, diced

Method:

1. Process in a food processor with an 'S' blade until thick and creamy.
2. Place the mixture in a large bowl.
3. Mix in celery and onion (or to taste).
4. Serve on romaine lettuce leaves with our Hippocrates 'Pickles' on the side.

*Chef's note: Store for up to 3 days in the refrigerator. Don't worry if it turns dark and starts to separate. Simply stir and serve. Leftovers can also be made into dehydrated crackers.

CRISTIN MACNEAL'S STORY

HEALING DUCTAL CARCINOMA THROUGH LIFESTYLE TRANSFORMATION

Eight years ago, I was diagnosed with ductal carcinoma in my breast. Conventional doctors quickly recommended aggressive surgery and chemotherapy, but something deep inside told me there was another way. A woman I met had healed naturally after attending the Hippocrates Comprehensive Cancer Wellness Program. Inspired, I enrolled—and everything changed. Six months after completing the program, I was cancer-free. But over time, stress, pandemic pressures, and self-destructive old habits led me away from what had saved my life. When the cancer returned, so did my commitment. I returned to Hippocrates for a deeper healing journey—this time with renewed focus, emotional support, and community connection. Within two weeks, I felt a dramatic drop in inflammation. I was healing again. Hippocrates reminded me that self-love, consistency, and support are key to transformation. True healing is possible; you just have to have the depth, desire, and determination to do so.
